\$5,000 per year scholarship

The Vice-Chancellor's Excellence Scholarship is awarded to students in recognition of academic excellence. Recipients will receive \$5,000 per annum for the normal duration of their chosen degree, plus a one-off payment of \$2,000 towards an international study experience*.

Swinburne also offers scholarships to students from indigenous backgrounds, students suffering from financial hardship and students who have relocated from regional areas to study.

For a full list of scholarships, including value and eligibility criteria, visit swinburne.edu.au/scholarships

One of the many fully equipped, state-of-the-art laboratories at the university. The Exercise and Sport Science Lab. The Anatomy Lab (with human-sized iPads).

*International study experiences are dependent on government travel guidelines.

Get more from your Swinburne experience

Guaranteed real industry experience

At Swinburne, your education is more than reading; with our Work Integrated Learning program, it's doing. Start building your résumé with placements, internships and industry-linked projects while you study. Real industry experience is guaranteed in all our bachelor degrees that commence in 2021 and beyond.

Double degrees

Double degrees are a great way to broaden your study experience and are highly respected by employers. They combine two areas of study and, on completion, you'll be awarded two degrees. A double degree is generally only one year longer than a single degree.

Consider combining your Health Science degree with another study area by studying:

- Bachelor of Health Science/Bachelor of Applied Innovation
- Bachelor of Health Science/Bachelor of Business
- Bachelor of Health Science/Bachelor of Media and Communication
- Bachelor of Health Science/Bachelor of Science

Pathways to a degree

UniLink diplomas

UniLink diplomas are equivalent to eight units of study (typically one year of full-time study) and can provide a pathway to the second year of a related bachelor degree.

These courses are an option for students who miss direct entry to a degree or who would benefit from a more supportive style of learning.

Vocational education

Diplomas and certificates are vocational qualifications that provide practical teaching and skills for work. A vocational qualification could prepare you for your first job, help you excel in your current job or take the first step in a career change.

Successful completion of a vocational qualification may also allow you to progress to another qualification with advanced standing.

Only uni in Australia

To have both MRI and MEG labs in a single-site
