

MASTER OF PHYSIOTHERAPY

Physios for the future are made here

DURATION:

2 years full-time

CAMPUS:

Hawthorn

INTAKE:

Semester 2

swinburne.edu.au/master-physio

Physiotherapy involves assessing and treating individuals across the lifespan who are experiencing physical difficulties caused by illness, disability, chronic disease or injury.

It's one of the fastest-growing and evolving health fields.

Studying a Master of Physiotherapy at Swinburne will equip you with the skills, knowledge and understanding to become a confident, resilient and enterprising entry-to-practice physiotherapist.

You'll build on your background of science or exercise and sports science, developing physiotherapy skills through a combination of face-to-face and online learning, as well as professional placements.

You'll be empowered to drive innovation in the field with units in Digital Health and Technology, and Business, Leadership and Enterprise. You'll also engage in self-evaluation and reflection with a 'Knowing Self' unit, where you'll be paired with physiotherapy mentors to help you become an agile, engaged and capable health professional.

OUTCOMES

Successful graduates will be eligible for registration as a physiotherapist.

PROFESSIONAL PLACEMENTS

You will be required to complete four clinical practice placements during the course. Through Swinburne's "In-Practice" Work Integrated Learning program, you'll also partner with physiotherapy industry leaders to get an authentic experience of clinical environments and health care systems.

ENTRY REQUIREMENTS

Applicants must have completed a bachelor degree in health science or exercise and sports science in the last 10 years and must have completed required prerequisite units; or have undertaken subsequent postgraduate studies.

Please visit our website for detailed information on admission requirements.

Further prerequisites may need to be achieved based on accreditation from the Australian Physiotherapy Council.
