

ANDREW PLAPP:

Meet Andrew Plapp.

A Swinburne student ready to show off his new cutting edge skills all thanks to Swinburne.

00:07:46:01 - 00:08:16:19

Speaker 2

it's not fine when you're breaking the law and stealing actual data and then selling, then forcing companies to hold its ransom to pay back to get access to that data or selling it to another competitor

Andrew is a student of one of the newest, and one of the most necessary courses of the modern age.

Cyber Security.

00:01:38:04 - 00:02:01:04

Speaker 2

to protect the data that you're using when you use that phone to make sure no unauthorized person can actually see and use that information for their own benefit.

PTC – Cyber security is one of the newest courses available here at swinburne and with the amount of hacks happening on a daily basis, it's one of the fastest growing industries for university graduates

Once graduated, Andrew hopes to start developing new technologies that will make systems more adaptable in their defense against foreign invaders.

Eliminating the need to continuously upgrade security software.

00:04:26:12 - 00:04:55:18

Speaker 2

Every time a new technology comes out, there's new vulnerabilities right there that are just waiting to happen because that's what the hackers do.
