Why work health and safety skills are critical

Work health and safety (WHS) qualified personnel are needed in almost every business, and this qualification gives you the skills to lead and manage WHS in your workplace, whilst future-proofing your career.

This qualification will develop your workplace safety knowledge, covering how to lead and manage WHS procedures, environment, risk, and quality systems.

The Swinburne Edge approach is to not only deliver the technical skills you need to be a qualified WHS professional, but also to develop the leadership and management skills needed to do the job.

This qualification develops the skills to:

- contribute to the systematic management of WHS risk
- conduct WHS risk management processes
- facilitate the development and use of WHS risk management tools
- contribute to the development, implementation, and maintenance of elements of a WHS management system
- contribute to managing work health and safety information systems to support WHS management
- manage the identification, review, development, implementation, and

evaluation of effective participation and consultation processes

- plan documents, draft text, prepare final text, and produce documents of some complexity
- plan, conduct, and report on investigations of WHS incidents that have resulted in, or have the potential to result in, injury or damage.

Course inclusions

- access to industry experts who facilitate the workshops through [Live Online](#) delivery
- program materials and manuals used in the workshops, which double as a take-home resource
- templates, tools, and many other resources are provided
- assessment and study support.

Who should attend?

This qualification is suitable for people who coordinate and maintain the work health and safety (WHS) program in an organisation.

Entry requirements

All five core units from the [BSB41419 Certificate IV in Work Health and Safety](#) or equivalent competencies:

- BSBWHS412 Assist with workplace compliance with WHS laws
