HAMMONDTHINKING

Dr Nives Zubcevic-Basic Course Director "As marketers, we need to be at the cutting edge of consumer behaviour, which for me, makes marketing the most dynamic part of any business.

The AGSE's Master of Marketing is the first one in the country to have a genuine industry co-creation process from development to delivery. We sit down with our industry partners and investigate what is relevant to them: what they need from future employees, and what industry trends are occurring.

We embed experiential learning – real clients, live projects and interactions with industry partners. It's a more memorable experience for students and they can quickly incorporate what they're learning into their workplaces."

Much of their teaching is steeped in practicable, real-world cases and learnings, therefore when going into industry it was easy to put my skills into practice. Furthermore, I was working with real world clients so I got to apply my learnings to clients within industry. It was also satisfying to see clients actually implement some of the recommendations."
