

## Launch Now! Program

**Careers and academic skills training to empower students to achieve their full potential.**

Explore our tailored programs designed to build aspiration and equip students with the confidence to navigate their high school years and beyond. These adaptable and innovative workshops have been developed in line with the Victorian Schools Careers Curriculum, encouraging students to discover their interests, delve deep into career exploration, and build a greater understanding of career management. Our activities aim to foster continuous self-development, empowering students to shape their own future through identifying meaningful and fulfilling pathways.

### Year 9

Our Year 9 program includes a combination of in-school and on campus workshops, encouraging students to envision themselves in the evolving world of work, while recognising the skills already at their disposal to navigate their future. Students are provided the opportunity to spend a full day at Swinburne to practice and refine these skills as they engage and lead career conversations with professional and Academic staff. The program is designed to ignite students aspirations and enhance their ability to design their future pathways.

### Year 10

Students will have the opportunity to engage in an immersive, on-campus full day experience where they will gain valuable knowledge into post-school life. Students will explore their individual career identity through engaging in hands-on learning workshops across a range of discipline areas, discovering innovative spaces, and attending student panels that debunk common myths about tertiary education and university access.

### Year 11 & 12

Throughout VCE, our team can work with you to design specific mentoring opportunities tailored to meet the needs of your school. Students will also have the opportunity for peer mentoring via a range of empowering workshops aimed at building essential skills and knowledge to enhance their VCE journey and prepare them for post school learning. Sessions will focus on:

- Study success skills
- Stress management and wellbeing
- Financial resilience
- Swinburne Early Entry Program and Pathways
- Special Entry Access Scheme (SEAS)
- Pathway information sessions and
- Scholarship application support
