Important Information on CASA Medical Certificate

A CASA Aviation Medical Certificate is a mandatory requirement for the required progression in the flight training component of the course. If a student does not hold a valid CASA Medical Certificate by the Semester 1 Census Date, the student will be required to be withdrawn from the unit and the student will be required to personally make payment for any flight training undertaken to this date directly to CAE Oxford Aviation Academy (CAE OAA). The student will only be eligible to re-enroll in the unit once a CASA Aviation Medical Certificate is held and recorded on the CAE OAA student file.

Once a student commences the Class 1 Medical application process, they need to enter and submit their complete medical history in Medical Records System (MRS) prior to seeing a DAME. The student will be required to make payment in MRS for the Aviation Medical. Unless this step is completed the DAME will not be able to start the medical exam, please see the link below for further helpful information.
